

AMENDMENTS TO THE SPECIFICATION:

Please amend the Title as follows:

USE OF A POLYAMIDE POLYMER IN A LIPSTICK COMPOSITIONS
COMPRISING CONTAINING HETEROPOLYMERS AND AT LEAST ONE OIL-
SOLUBLE POLYMERS AND METHODS OF USING SAME CHOSEN FROM ALKYL
CELLULOSES AND ALKYLATED GUAR GUMS

Please amend the Abstract as follows:

~~Structured compositions~~ Compositions comprising at least one structuring
polymer, such as a structuring polymer chosen from polymers of the following formula
(I):

in which n denotes a number of amide units, such that the number of ester groups
represents from 10% to 50% of the total number of ester and amide groups; R¹ is, in
each case, independently an alkyl or alkenyl group having at least 4 carbon atoms; R²
independently represents, in each case, a C₄ to C₄₂ hydrocarbonaceous group,
provided that 50% of the R² groups represent a C₃₀ to C₄₂ hydrocarbonaceous group;
R³ independently represents, in each case, an organic group provided with at least 2

carbon atoms, with hydrogen atoms and optionally with one or more oxygen or nitrogen atoms; and R^4 independently represents, in each case, a hydrogen atom, a C_1 to C_{10} alkyl group or a direct bond to R^3 or another R^4 , so that the nitrogen atom to which both R^3 and R^4 are bonded forms part of a heterocyclic structure defined by R^4-N-R^3 , with at least 50% of the R^4 groups representing a hydrogen atom, and at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums. The compositions may further comprise at least one fatty alcohol. This ~~invention~~ composition may be in the form of stable compositions such as, for example, make-up sticks, lipsticks and sunscreen sticks.
